

What is claimed is:

1.A three-dimensional disposition structure of an electric board component, comprising:

an electric board;

5 several elements, comprising:

several plane elements, which have at least one short connection leg;

10 several elevated elements, which have at least one long connection leg; wherein, the plane element is welded onto the electric board and its bottom is close to the electric board, and the elevated element is welded onto the electric board and its bottom is above the plane element.

15 2.The three-dimensional disposition structure of an electric board component of the claim 1, wherein the long connection leg of the elevated element may decide its external form and length according to the actual altitude of the plane element.
